

Instruction for installation and signing for B-Trust Desktop Signer

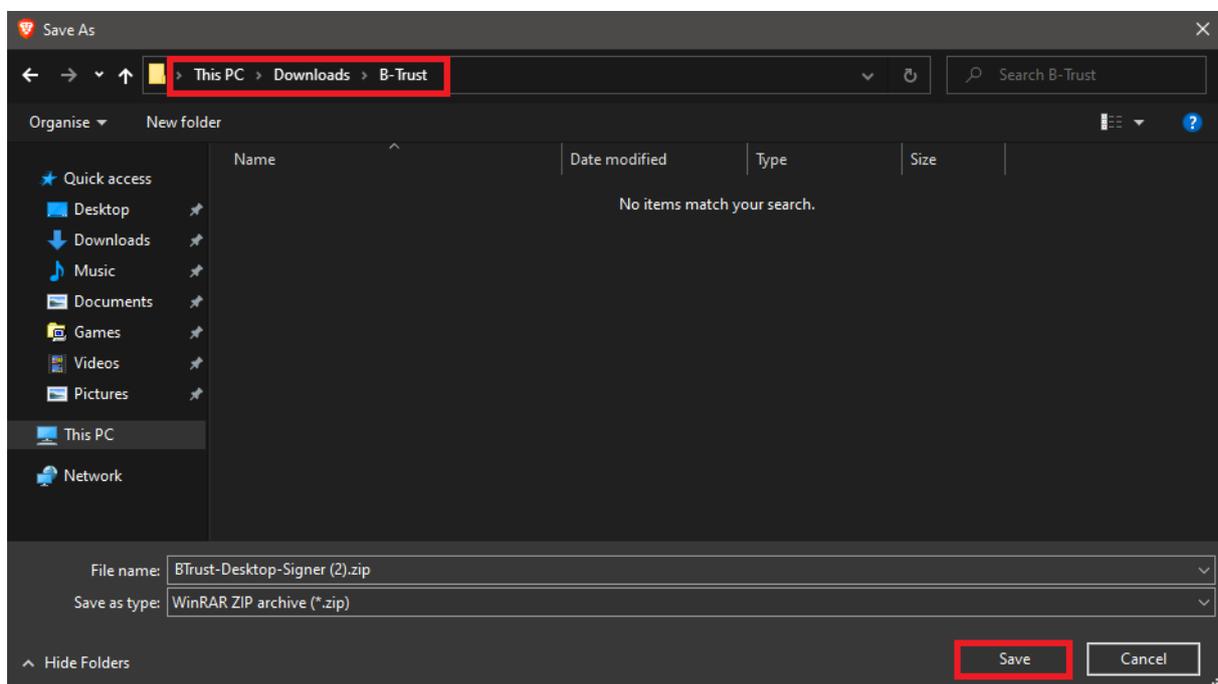

I. Installation of B-Trust DesktopSigner.

- Open the following address in browser: <https://www.b-trust.bg/en/client-center/software>

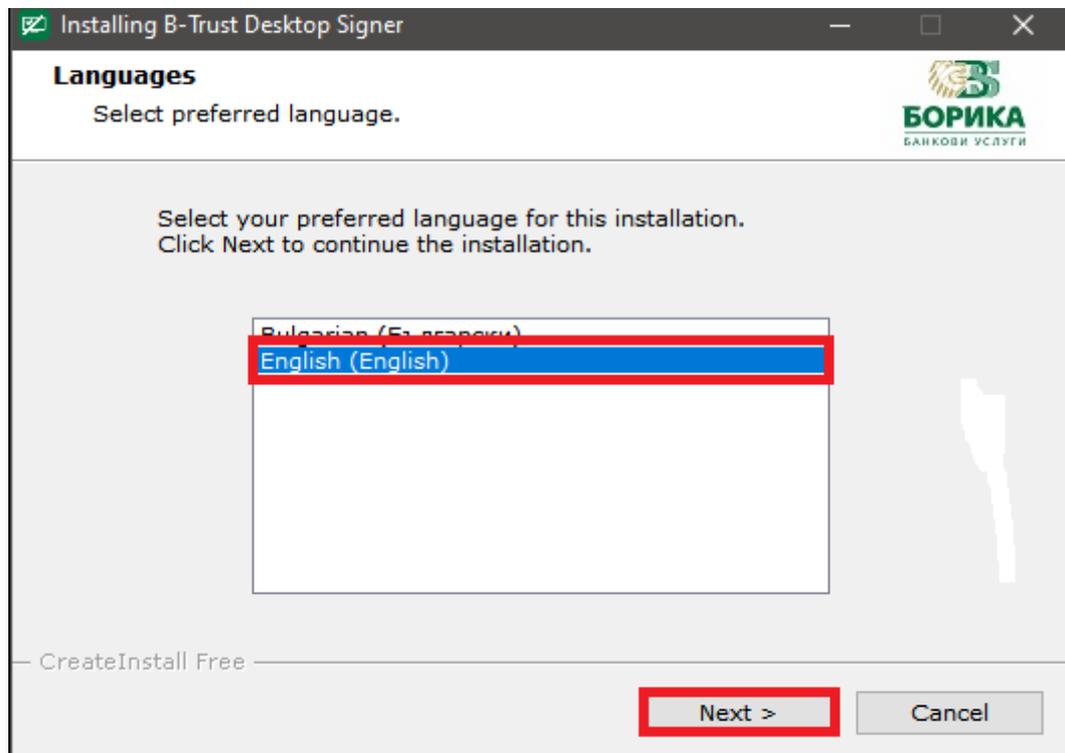

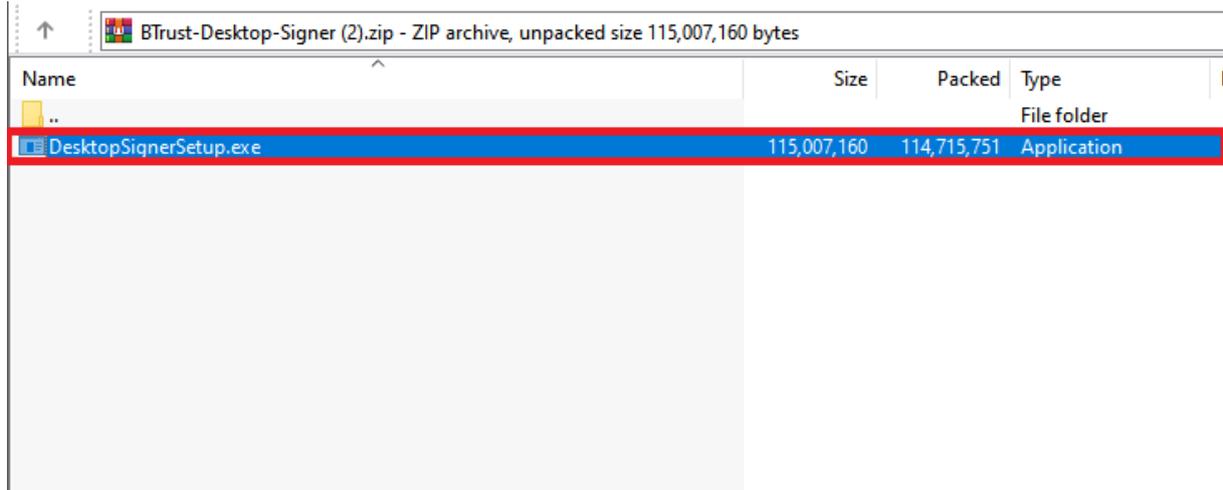

The screenshot shows a web page for 'B-TRUST DESKTOP SIGNER'. The page title is 'B-TRUST DESKTOP SIGNER'. Below the title, there is a description: 'Free software application for signing electronic documents/files with Qualified Electronic Signature in accordance with the Electronic Document and Electronic Signature Act. The product allows manual or automated signing of one or many documents/files. There is a possibility for adding Time Stamp certificate to the electronic signature, as well as encryption/decryption of files in any format.' Below the description, there is a 'DOWNLOAD:' section and an 'INSTALLATION AND OPERATING INSTRUCTIONS' section. In the 'INSTALLATION AND OPERATING INSTRUCTIONS' section, there are two links: 'MS WINDOWS: B-TRUST DESKTOP SIGNER' and 'MAC OS X: B-TRUST DESKTOP SIGNER'. Both links are highlighted with a red box.

- Download B-TRUST DESKTOPSIGNER:
 1. Installation of the signing application:

- Open the archive and start the installation package:

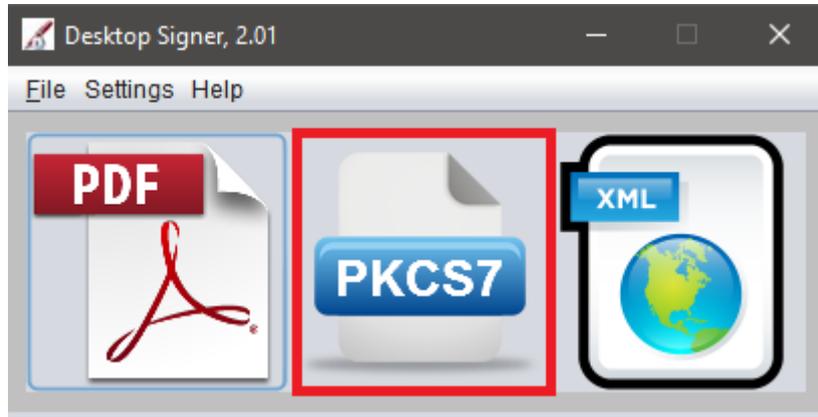

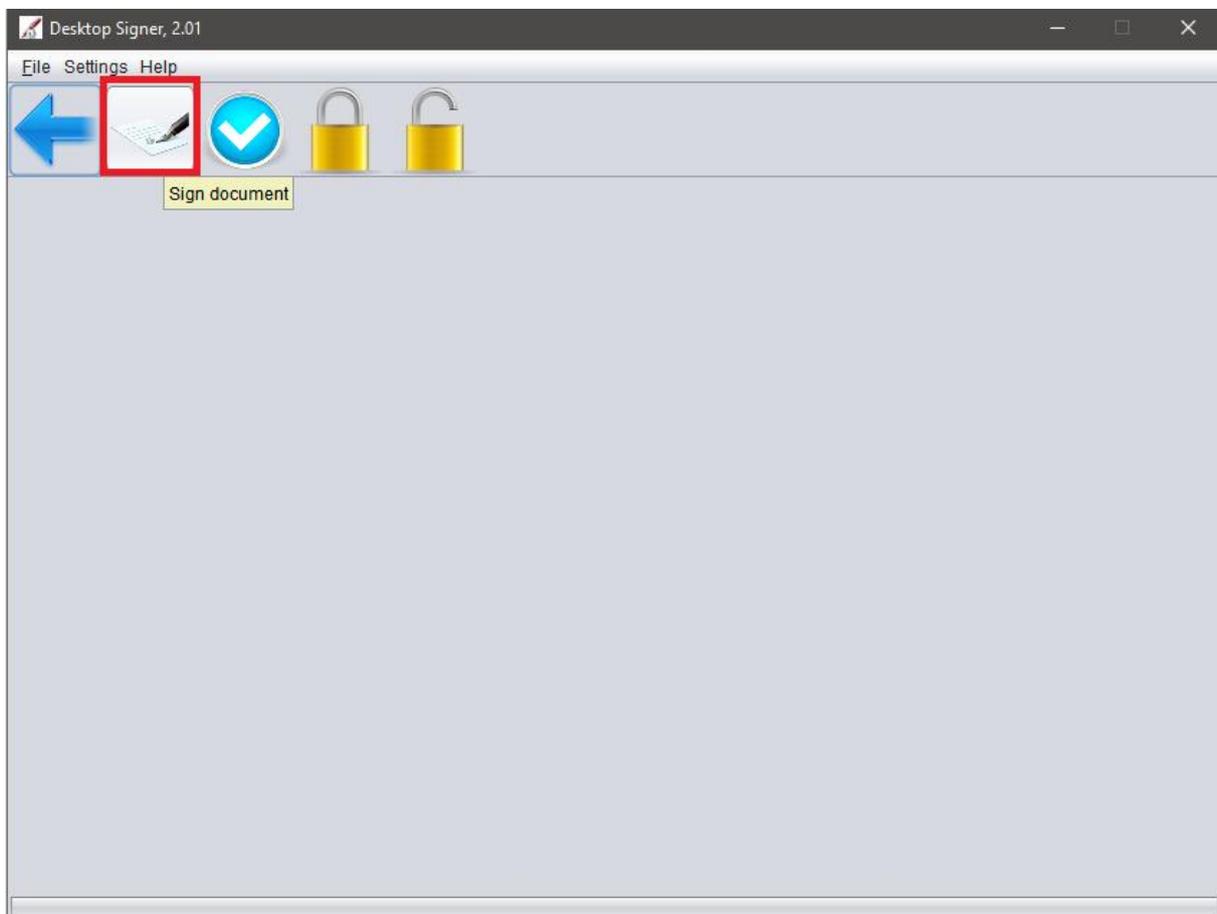

II. Signing documents in PKCS 7 format using B-Trust DesktopSigner

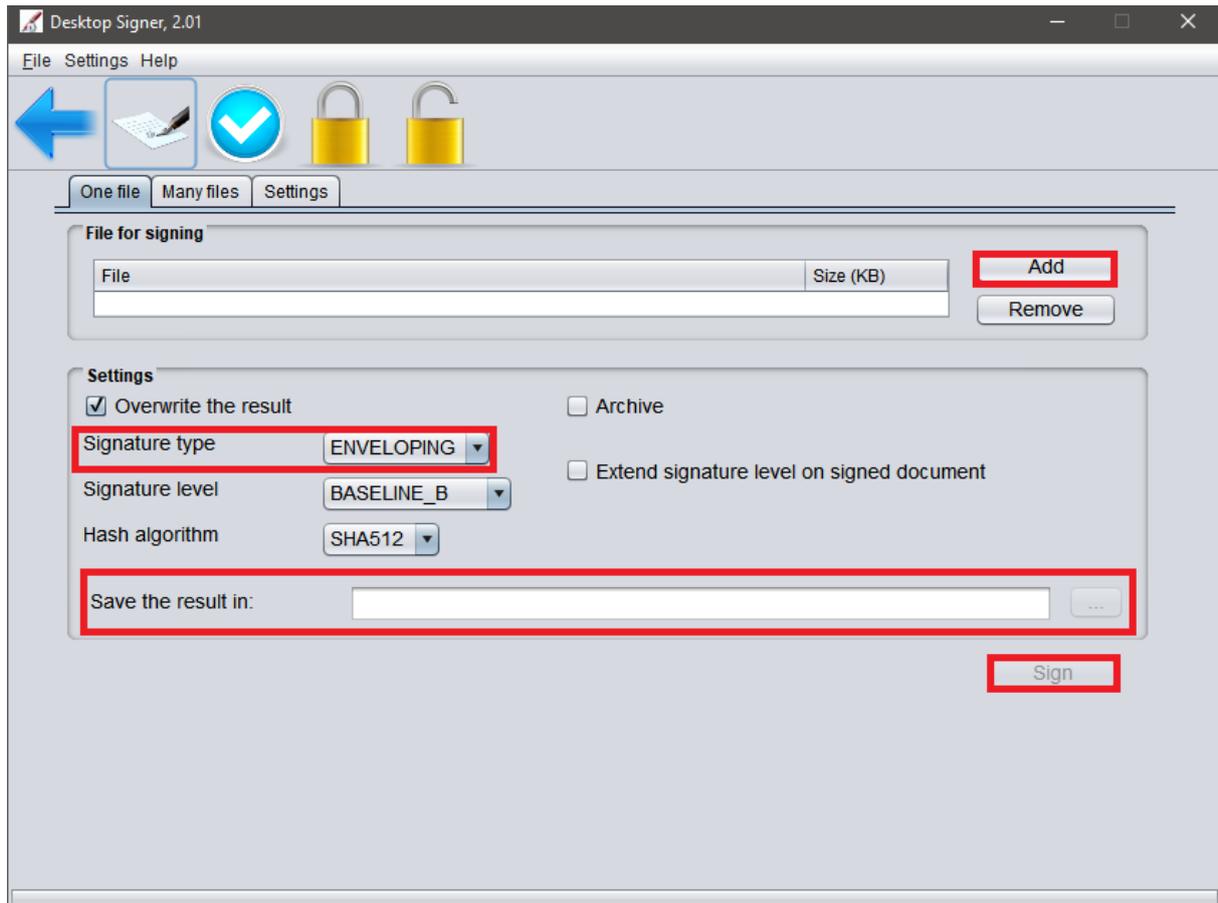

- Start the application and select “PKCS #7”:

- Select the “Sign Document” option:

- Signing options in DesktopSigner:

- From “Add” you should choose the document for signing.
- The option “Signature Type” define the format that would be used for the signing. “Enveloping / Attached” means that the signature and the signed document would be stored as one file. The “Detached” options means that the signature would be stored on single file out of the document. While signing with “Enveloping / Attached” the files would end with “.p7m” extension and for “Detached” with “.p7s”
- From the “Save the result in” you should choose the directory where the signed file would be saved.
- The last step is to select “Sign” and enter the PIN for your signature.
- After successful signing you will receive message “The file was successfully signed”
